## About Research Center

Developing countries need more research oriented educational for betterment of human existence and also to lead a path success for future generation. G M I T being a high-tech educational institute has enabled both faculty and student fraternity to take up research in their area of interest. In this connection as part of UG program the students are made to take up projects which place important role in inculcating them in research angle.

The department of computer science and engineering has a additional feather due to areas in which the students will be guided for their UG projects in specific six areas such as health care, education, agriculture, research oriented, networking and image processing have been earmarked for doing project.as additional achievement 90% of our faculty are scholars in research who work in the designated area. The projects will be sent for funding to state government, KSCST generally funds projects related to societal benefits. In this connection department as good record of getting minimum of three/four projects getting funded every year.
