POST-GRADUATION PROJECTS

Project Title: Detecting Bluetooth enabled devices using android mobile.

Using JAVA ECLIPS

In this project we are going to develop the android application for android mobile which links Bluetooth device tag onto these items. It shows the Strength and Distance of the Bluetooth device using android mobile. It works based on Bluetooth technology. It is suitable for everyone especially the elders and the disables. Whenever they go out, using this android application they will easily find out their forgotten items.
